

# age calculator

waterside

## Your Mission

Create a program in Scratch or Python that asks the user to enter their name and year of birth.

### Level 1

The get the program to say:

*Hi <name entered> you will be <age calculated> this year.*

### Level 2

Add to the output of level 1:

*Did you know your name has <number of letters> letter in it, and this year you are an <odd/even> age.*

### Level 3

Add to the output of level 2

Your name has <no of vowels> in it and in 2030 you will be <age in 2030> years old.
