

Name Maker

Your Mission

Review code from last week. Identify a variable and input and an assignment. Show these to a someone else

Create a program in Scratch or Python that asks the user to enter their first name last name.

Level 1

The get the program to say:

"Hey <first name> <last name> that's a great name" by concatenating (joining) the two variables created.

Level 2

Enhance program, so that if the name Colin is entered, it says "oh no not you!"

Level 3

Create a process that picks a random COMPLIMENT from a saved list of COMPLIMENTS and make an appropriate change to your program to use that instead of "great"
