

Show & Tell

Your Mission:- 3 weeks to prepare for showing to parents/guardians on 16th July 2026 and upload to showcase

Using the knowledge you've built up create an animated face that the user interacts with, it should:-

1. Asks the user their name
2. Uses that name to produce a complimentary statement from an item picked from a list of compliments
3. Then does a did you know that from September returning coders will be by invitation only. If yes move to 5, if no go to 4.
4. A message that explains we want to maintain focus coding rather than gaming
5. A message that says "The best thing about code club is <what you like best>"
6. Make the animation animated, maybe move around, maybe nod head, maybe blink eyes, or something else, be adventurous
7. A final message to say that the Police are coming to talk about internet safety
8. Get someone else to test your animation and feedback on improvements. There is no rush!
