

About us:

Code club is a global organisation helping young people realise their full potential through the power of computing and digital technologies.

What does this mean? At our club we use a variety of programmes, Scratch (A fantastic resource that is really powerful and an ideal platform to start learning ([Scratch - Imagine, Program, Share](#)), Python (traditional programming), HTML/CSS (web pages). Physical Computing via Lego Robotics, Micro:Bits, Raspberry Pi's, Pico's and basically anything else we find that we can expose to the youngsters.

We are a group of volunteers with a broad techy knowledge base, and all have a passion for sharing our knowledge in a fun and friendly way. We are all DBS checked, work well as a team, and our approach is to introduce computing concepts in a fun way, challenging when needed but always remembering that the youngsters come in their own time. Whilst we are fortunate enough to have access to a computer suite in Noadswood Academy, we are definitely not a traditional class.

Children in year 5 and above from any school in our area are welcome, we expect mistakes and bugs, and introduce methods to solve them. Lots of thinking, lots of fun, lots of success which we celebrate at our end of session show and tell. We meet weekly term time on Thursdays 15:40-16:45 and aim to have other events during holidays. If interested please register on the link below.

New intakes happen 6 times a year in each half term. We will collect them at 15:40 from reception and drop them back at 16:45

We are in a transition phase at our new home and are working on ways for you to see the work our amazing youngsters produce. A link will eventually appear on our club page below.

Any questions, please feel free to mail us at watersidecodeclub@coderdojo.com

Useful info

The official home page of Code Club is found here: [Free coding clubs for kids | Code Club](#)

Our local page is found here: [Waterside Code Club](#)

Please subscribe to the club, that way you'll receive updates in future, no spam, just event notifications and occasional items of interest (tips, safety/security etc.)

To be added to the waiting list please register here: [Registration Form](#) We will contact you ahead of our next new starters date in the next half term..

Emergency Phone number for Club sessions is 07856305821

Email is watersidecodeclub@coderdojo.com
